

Response Types	Sectors	Priorities	Specific Objective	Activities	Rank	Budget		
Host Communities	Education	Reach all vulnerable children and youth in Jordan with quality education through responsive, inclusive and evidence-based education delivery and adequate education systems	Ensure access to education and equity for all students regardless of age or gender	Procure tutoring for computing skills, procure e-learning devices for teachers	1	6,500		
				Provide transportation for CWDs to get to school	1	0		
				Support mobile classrooms to provide educational sessions to children with disabilities (CWDs) in underserved areas	1	100,000		
				Train LSTs on individualized learning programs for learning loss recovery and accelerated learning for CWDs	1	57,600		
				Train tutors on individualized learning programs for learning loss recovery and accelerated learning for CWDs	1	3,466		
				Conduct awareness-raising events at those schools that received accessibility enhancements to showcase the improved school and raise awareness about disabilities. Include activities for children to challenge stigmas and bullying and to promote inclusion of children with disabilities.	2	100,000		
				Design and deliver private tutoring sessions to low progressing Grades 4-12 CWDs that cannot catch up with their peers; content based on accelerated learning approaches and including topics: (1) Core subjects (English, Math, Science), (2) Vocational BTEC topics, (3) Exam entry and guidance	2	250,000		
				Implement accessibility adjustments at schools agreed with the Ministry of Education (MoE) to support people with visual and physical disabilities. These may include: modifications to bathrooms, installation of ramps, placement of tactile floor tiles, painting doors and walls borders, under the guidance of and in coordination with MoE	2	2,000,000		
				Conduct training to school communities to increase awareness of CWDs' needs and to increase community cohesion	3	0		
				Develop advocacy and communications activities on inclusivity and diversity in education	3	200,000		
		Ensure access to education and equity for all students regardless of age or gender	Equip classrooms with necessary tools and teaching equipment. Provide accessibility learning assistance for students who need it	1	800,000			
		Ensure improved, equitable and inclusive access to non-formal education for Syrian refugee children and other vulnerable groups, including children with disabilities, and children out of school.	Support salaries for NFE staff	1	0			
						Capacity building for NFE staff	2	0
						Cover transportation for NFE students	2	0
						Equip and maintain catch-up centers	2	100,000
						Equip and maintain dropout centers	2	400,000
						Establish collaborations with the private sector to support scholarship pathways to third and fourth cycle non-formal education (NFE) graduates to continue their vocational training and education at vocational training centers	2	20,000
						Expand rooms in catch-up centers	2	200,000
						Expand rooms in dropout centers	2	400,000
		Ensure sustained quality educational services for children and youth impacted by the Syria crisis	Implement National School Feeding Program (NSFP) as a part of the National School Feeding Strategy (2021-2025) by providing fortified date bars to students from KG to 6th grade in communities	1	6,440,077			
						Develop and implement capacity-strengthening initiatives for responsible institutions to implement school feeding programs	2	537,500
						Conduct an HR assessment to identify human resource opportunities and gaps required to achieve the strategy objectives	3	0
						Conduct continuous quality assurance to assess school kitchens' compliance with health standards	3	268,750
						Develop a field expense tracking system	3	33,333
						Develop an effective M&E and reporting system for schools, including a feedback system for school communities	3	268,750
						Provide social and behavioral change communication (SBCC) for nutritional activities to children from KG to 6th grade, and to parents through approved curricula and tools.	3	247,500
Support School Improvement Committees to improve the school environment and quality of education	3					107,500		

				Work with schools to introduce the school feeding program and introduce Standard Operating Procedures for school kitchens	3	537,500	
		Increase access to quality education for children (male and female) in early childhood		Expand KG classrooms in public schools, ensure provision of furniture and equipment	2	1,000,000	
				Conduct a voucher system with public-private partnerships to encourage the private sector to receive KG2 aged students at private schools especially in areas where public KG is underserved	4	5,000,000	
				Support the rollout of capacity building for competency-based teaching approaches and procurement of tools for KG-3rd grades	4	1,510,800	
				Adapt career guidance activities for grades 7-10 to direct them in their career path/educational path	5	475,500	
				Build KG-Grade 3 teacher capacity through training in play-based learning and delivery of resources.	5	0	
				Conduct a communication and mass media awareness campaign to increase community knowledge of the importance of early childhood education	5	0	
				Conduct capacity-building to public and private KGs on the new quality assurance system	5	944,250	
				Develop children's educational programs for online and TV channels	5	100,000	
				Develop educational programs for parents on all areas of child development – social, emotional, health and psychological, including the importance of education, child rights, nutrition, etc.	5	0	
				Develop learning engagement activities to encourage parents' participation in early childhood education; encourage parents to read to their children and practice math	5	500,000	
				Develop reading events, activities and awards for KG-3rd grade	5	600,000	
				Establish mobile libraries to cover a larger geographical area and ensure KG children are reading	5	110,000	
				Implement a Learning Bridges program for grades 4-10 in MOE schools nationwide, aiming to contribute to their learning recovery; support targeted centers nationwide to implement Learning Bridges Clubs for vulnerable children to provide them with safe spaces and support to complete Learning Bridges Activities.	5	1,877,000	
				Implement accelerated learning programs in targeted schools including for literacy and numeracy	5	3,754,000	
				Implement the school readiness programs for KG students entering Grade 1	5	0	
				Initiate a pilot scheme to provide public KG1 services (one KG1 for each directorate).	5	0	
				Organize extracurricular activities to encourage children to develop their talents; focus on talent and skills development for grades KG-12	5	3,804,000	
				Partner with the private sector to engage vulnerable young Jordanians and Syrians with and/or without disabilities in civic and economic activities	5	102,125	
				Procure educational stories and books for KG-3rd for school libraries	5	0	
				Procure learning-by-playing tools for KG2 students	5	0	
				Rehabilitate centers of other ministries to use as KGs in some underserved areas	5	30,000	
			Increase access to vocational education and improve its quality (including in UNRWA camps)		Conduct maintenance work for existing vocational education classrooms and workshops, including equipment	3	443,333
					Support establishment and equipment of vocational training centers for continuous professional development of TVET teachers and supervisors (Corresponds to MoE activity 16)	3	250,000
				Establish collaboration with the private sector to support scholarship pathways to vocational training for vulnerable students to continue their post-secondary education at vocational colleges, training centers and institutes	4	1,000,000	
				Establish workplace training and apprenticeships for students within the private sector	4	50,000	
				Develop a labor market information kit for students, to include information on skills required in the labor market and potential occupations	5	75,000	
				Build capacities of teachers, technicians and supervisors to provide career guidance to students in primary and secondary school	8	152,640	
				Conduct an assessment of apprenticeships to bring in lessons learned and required improvements from employers and students	8	5,000	
				Design and conduct professional development and orientation events with vocational experts from local organizations and the private sector for educators and students of vocational schools	8	133,000	
				Develop a package of career counselling and skill-building events for educators and students with a focus on transitioning to the labor market	8	266,000	
				Develop apprenticeship kits for the private sector to provide guidance on the apprenticeship syllabus, and the skills and competencies needed by students	8	75,000	

				Develop inclusive assessment tools and guidelines to accommodate CWDs in TVET programs	8	133,000	
				Establish career guidance centers in vocational schools	8	1,750,000	
		Ensure availability and sustainability of qualified human resources for the educational system		Train school counselors on PSS	4	12,000	
				Automate needs identification and professional development management systems	4	83,333	
				Conduct conversational fluency program for English teachers of KG-12 with the private sector	4	1,510,800	
				Conduct Teaching-Learning Communities	4	188,850	
				Develop and deliver a training program to KG-12 Grade English teachers based on real life topics in after-school clubs, that integrates private sector speakers	4	1,510,800	
				Develop and deliver an English upskilling program for teachers of students in Grades KG-12 based on real life topics in after-school clubs	4	1,593,200	
				Establish professional learning communities for teachers to support professional development	4	900,000	
				Establish six early grade (1-3) training centers in directorates to improve the quality of in-service training; procure equipment and resources	4	466,667	
				Provide teacher training on inclusive and student-centered pedagogy, classroom management and psychosocial support (PSS)	4	356,000	
				Support CPD training to supervisors, mentors and teachers on digital tools, life and business skills	4	356,000	
				Support teacher and supervisor training on blended learning approaches	4	356,000	
				Support the establishment of a digital examination center to conduct national and international assessments	4	700,000	
				Train teachers on Social-Emotional Learning (SEL) Inclusive Education (IE) and working with parents.	5	356,000	
			Safe, comprehensive and accessible school infrastructure for all, with a focus on gender and disability		Design and construct new inclusive schools to serve Jordanian and non-Jordanian students	1	0
					Expand classrooms and playgrounds in schools to reduce crowding following MOE's operational plan for construction	1	10,000,000
				Promote good practices to build capacity within the School Directorate and Governorate Council for "Assessment-informed Construction and Maintenance"	1	35,000	
				Conduct rehabilitation and maintenance works (including WASH facilities) based on a school facilities audit, following the MoE operational and maintenance system model	2	18,885,000	
				Procure maintenance supplies for schools	2	377,700	
				Rehabilitate and procure school furniture, including heating and cooling units	2	7,500,000	
				Expand the intranet and Wi-Fi connections in schools to serve the blended learning application	4	1,888,500	
				Automate the self-review system, development plans, collecting common needs, tracking plans, grants, and school budgets	7	200,000	
				Procure and support access to digital tools and devices for blended learning approaches	7	22,662,000	
				Support hosting and advancement of learning platforms to expand outreach to rural and vulnerable areas	7	750,000	
		Strengthen the Safe Learning Environment and community engagement at MoE schools to foster a quality inclusive education system		Create community activities that engage students, parents and active community members to plan and execute school improvement activities. Activate continuous community events and partnership, set up funding mechanisms for maintenance and activities	6	760,800	
				Deliver awards (monetary and non-monetary) to students for upkeep of a safe school environment.	6	1,902,000	
				Design and deliver orientation sessions to all school staff on the implementation of school policies, including the code of conduct and activities regarding disciplinary practices. Establish a system for detection, referral, response and reporting of disciplinary actions	6	760,800	
				Design and deliver orientation sessions to students including the code of conduct and general behavior. Establish a system for detection, referral, response and disciplinary action, including a reporting element	6	760,800	
				Develop a detection, referral and response system for students at risk of drop-out and reckless behavior.	6	-	
				Develop a reporting mechanism at school to monitor and document behavioral incidents and disciplinary actions	6	-	

				Establish a reporting system for schools and directorates based on activities within and outside schools (including community events), monitor and report on upkeep of the school environment	6	5,000
				Establish a reporting system to parents on student behavior and disciplinary action	6	25,000
				Organize group sessions by counselors about vandalism routes and prevention; assign students as speakers in these sessions	6	475,500
				Provide academic and psychosocial support to students at risk of falling behind	6	570,600
				Review and revise the code of conduct and any tools used for disciplinary procedures	6	5,000
				Support schools with extracurricular activities that encourage community work and awareness in the school environment; strengthen youth centers, athletics clubs, after-school study groups or clubs to foster a sense of belonging and ownership.	6	3,804,000
				Train school staff on extracurricular activities	6	3,600,000
Refugees in Host Communities	Education	Reach all vulnerable children and youth in Jordan with quality education through responsive, inclusive and evidence-based education delivery and system	Ensure access to education and equity for all students regardless of age or gender	Equip classrooms with necessary tools and teaching equipment. Provide accessibility learning assistance for students who need it	1	200,000
				Implement accessibility adjustments at schools in coordination with the Ministry of Education (MoE) to support people with visual and physical disabilities. These may include: modifications to bathrooms, installation of ramps, placement of tactile floor tiles, painting door and wall borders	1	500,000
				Design and deliver private tutoring sessions to low-progressing Grade 4-12 CWDs that cannot catch up with their peers. Content is based on accelerated learning approaches and includes topics of (1) Core subjects (English, Math, Science), (2) Vocational BTEC topics, (3) Exam entry and guidance	2	12,500
				Procure tutoring for computing skills and e-learning devices for teachers	2	6,500
				Provide transportation for CWDs to get to school	2	0
				Train LSTs on the individualized learning programs for learning loss recovery and accelerated learning for CWDs	2	9,600
				Conduct awareness-raising events at those schools that received accessibility enhancements to showcase the improved school and raise awareness about disabilities. Include activities for children to challenge stigmas and bullying and to promote inclusion of children with disabilities.	4	25,000
				Provide training to the school community to increase awareness of CWDs' needs; increase community cohesion	4	0
			Ensure improved, equitable, and inclusive access to non-formal education for Syrian refugees and	Cover transportation costs for NFE students	2	0
			Ensure sustained quality educational services for children and youth impacted by the Syria crisis	Implement the National School Feeding Program (NSFP) as a part of the National School Feeding Strategy (2021-2025) by providing meals to students from KG to 6th grade	1	595,000
				Support financing of contracted teacher salaries in host communities	1	0
				Support running/operational costs, and utilities schools	1	247,200
				Conduct continuous quality assurance to assess school kitchens' compliance with health standards	2	99,167
				Provide back-to-school supplies for underprivileged students (including tuition, books and bags)	2	0
				Provide transportation to students and teachers	2	2,000,000
				Recruit school administration and technical support: Incentive Based Volunteers (IBVs)	2	1,751,000
				Work with schools to introduce the school feeding program and introduce Standard Operating Procedures for school kitchens	2	198,333
				Conduct assessment to identify opportunities and gaps related to human resources required to achieve the objectives of the strategy	3	0
				Develop an effective M&E and reporting system for schools, including a feedback system from the school community	3	99,167
				Develop a tracking system for expenses	3	33,333
				Develop and implement capacity-strengthening initiatives for responsible institutions to implement school feeding programs	3	396,667
				Provide social and behavioral change communication (SBCC) for nutritional activities to children from KG to 6th grade, and to parents through approved curricula and tools	4	59,500

				Support School Improvement Committees to improve the school environment and quality of education	4	39,667
		Increase access to quality education for children (male and female) in early childhood		Expand KG classrooms in public schools, procure furniture and equipment	2	500,000
				Build capacity of KG-Grade 3 teachers through delivery of play-based learning training and resources.	5	0
				Implement accelerated learning programs in targeted schools, including for literacy and numeracy	5	206,000
				Implement Learning Bridges program for grade 4-10 students in MoE schools nationwide, aiming to contribute to their learning recovery. Support targeted centers nationwide to implement Learning Bridges Clubs for vulnerable children to provide them with safe spaces and support to complete Learning Bridges Activities.	5	103,000
				Implement school readiness programs for KG students entering G1	5	0
				Organize extracurricular activities to encourage children to develop their talents, focus on talent and skills development for grades KG-12, and on civic and economic assessment	5	206,000
				Procure educational stories and books for KG3 school libraries	5	0
				Procure learning-by-playing tools for KG2 students	5	0
				Support rollout of capacity-building for competency-based teaching approaches and procurement of educational tools for G KG-3	5	82,400
				Adapt career guidance activities for grades 7-10 to help them in their career/educational path	6	25,750
				Conduct a voucher system for public-private partnerships to engage the private sector and encourage them to receive KG2 students at private schools especially in areas where public KGs are underserved	6	10,000
				Conduct capacity-building for public and private KGs on the new quality assurance system	6	51,500
				Develop learning engagement activities to encourage parents' participation in early childhood education; encourage parents to read to their children and practice math	6	150,000
				Partner with the private sector to engage vulnerable young Jordanians and Syrians with and/or without disabilities in civic and economic activities	6	102,125
			Increase access to vocational education and improve its quality		Expand Vocational Education Schools, equip workshops appropriately	1
				Establish private sector collaborations to support scholarship pathways to vocational education for vulnerable students to continue their post-secondary education at vocational colleges, training centers and institutes	3	256,667
				Establish partnerships with industry experts to support vocational competence-based training for teachers and supervisors	3	23,707
				Establish private sector alliances to enhance career guidance in schools in terms of digital skills, tools and technology	4	100,000
				Facilitate transportation for refugees and vulnerable populations to access existing TVET centers.	6	64,167
				Establish workplace training and apprenticeships for students within the private sector	8	32,083
		Ensure availability and sustainability of qualified human resources for the educational system		Automate needs identification and professional development management systems	4	83,333
				Create training programs for teachers and supervisors on blended learning approaches	4	400,000
				Establish conversational fluency programs with the private sector for English teachers of Grades KG-12	4	82,400
				Establish six early grade (1-3) training centers in directorates to improve in-service training quality; procure equipment and resources	4	466,667
				Provide teacher training on inclusive and student-centered pedagogy, classroom management and psychosocial support	4	400,000
				Support the establishment of a digital examination center to conduct national and international assessments	4	700,000
				Train school counselors on PSS	4	16,480
				Train teachers on Social-Emotional Learning (SEL), Inclusive Education (IE), and work with parents.	4	400,000
				Conduct Teaching Learning Communities	5	10,300
				Develop and deliver a training program to KG-12 Grade English teachers based on real-life topics in after-school clubs; integrate private sector speakers and lecturers	5	82,400
				Establish professional learning communities for teachers to support professional development	5	250,000
			Support CPD training for supervisors, mentors and teachers on digital tools, life and business skills	5	400,000	

			Safe, comprehensive and accessible school infrastructure for all, with a focus on gender and disability	Conduct rehabilitation and maintenance works (including WASH facilities) based on a school facilities audit, following the MoE operational and maintenance system model	1	1,030,000
				Design and construct new inclusive schools across Jordan that serve Jordanian and non-Jordanian students	1	0
				Procure maintenance supplies for schools	1	20,600
				Rehabilitate and procure school furniture, including heating and cooling units	1	1,000,000
				Expand the intranet and Wi-Fi connections in schools to serve the blended learning application	2	103,000
				Procure and support access to digital tools and devices for blended learning approaches	2	1,236,000
				Support hosting and advancement of learning platforms to expand the reach to all rural and vulnerable areas	3	750,000
				Promote good practices to build capacity for the School Directorate and Governorate Council for "Assessment-informed Construction and Maintenance"	7	35,000
			Strengthen the Safe Learning Environment and community engagement at MoE schools to foster a quality inclusive education system	Design and deliver orientation sessions to all school staff on the implementation of school policies, including code of conduct and activities regarding disciplinary practices. Establish a system for detection, referral, response and reporting of disciplinary action	6	41,200
				Design and deliver orientation sessions to students on the code of conduct, behavior, a referral support system, rewards and disciplinary action	6	41,200
				Organize group sessions by counselors about vandalism routes and prevention, assign students as speakers in these sessions	6	25,750
				Provide academic and psychosocial support to students at risk of falling behind support schools with extracurricular activities encouraging community work and awareness on school environment upkeep. Encourage the use of youth centers, athletics, and after-school study groups or clubs to strengthen a sense of belonging and ownership	6	206,000
				Create community activities that engage students, their parents and active community members to plan and execute school improvement activities within the school and activate continuous community events and partnership.	7	41,200
				Deliver awards (monetary and non-monetary) to students for the upkeep of a safe school environment.	7	103,000
				Train school staff on extracurricular activities	7	400,000
Refugees in Camps	Education	Reach all vulnerable children and youth in Jordan with quality education through responsive, inclusive and evidence-based education delivery and system	Ensure access to education and equity for all students regardless of age or gender	Equip classrooms with the necessary tools and teaching equipment. Promote accessibility for CWDs, including learning assistance	1	100,000
				Implement accessibility adjustments at schools to support people with visual and physical disabilities; include modifications to bathrooms, install ramps and tactile floor tiles, paint door and wall borders, among other modifications, under the guidance of MoE	1	250,000
				Provide CWDs with transportation to get to school	1	0
				Procure tutoring for computing skills and e-learning devices for teachers	2	6,500
				Train LSTs on the individualized learning program for learning loss recovery and accelerated learning to CWDs	2	3,200
				Conduct awareness-raising events at those schools that received accessibility enhancements to showcase the improved school and raise awareness about disabilities. Include activities for children to challenge stigmas and bullying and to promote inclusion of children with disabilities.	3	12,500
				Train tutors on the individualized learning program for learning loss recovery and accelerated learning for CWDs	3	1,733
				Design and deliver private tutoring sessions to low- progressing CWDs in Grades 4-12 who struggle to catch up with their peers. Base content on accelerated learning approaches and include topics of (1) Core subjects (English, Math, Science), (2) Vocational BTEC topics, (3) Exam entry and guidance	4	62,500
				Provide training to the school community to increase awareness of the needs of CWDs to increase community cohesion	4	0
			Ensure improved, equitable and inclusive access to non-formal education for Syrian refugee	Support salaries for NFE staff	1	0
				Provide capacity-building for NFE staff	2	0
				Cover transportation costs for NFE students	2	0
				Equip and maintain dropout centers	2	40,000

			Children and other vulnerable groups, including children with disabilities, and children out of school.	Establish collaborations with the private sector to support scholarship pathways to third and fourth cycle NFE graduates to continue their vocational training and education at vocational training centers	2	5,000			
			Expand rooms in catch-up centers	2	40,000				
			Expand rooms in dropout centers	2	40,000				
			Ensure sustained quality educational services for children and youth impacted by the Syria crisis	Implement the National School Feeding Program (NSFP) as a part of the National School Feeding Strategy (2021-2025) by providing meals to students from KG to 6th grade in Syrian refugee camps	1	175,000			
			Support financing of contracted teacher salaries in camps	1	0				
			Support running/operational costs, and utilities in camp schools	1	90,000				
			Work with schools to introduce the school feeding program and introduce Standard Operating Procedures for school kitchens	1	37,500				
			Conduct continuous quality assurance to assess school kitchens' compliance with health standards	2	18,750				
			Procure generators for underprivileged schools	2	0				
			Procure solar-powered energy systems for underprivileged schools	2	0				
			Procure technical support for supervision of Syrian schools	2	0				
			Provide back-to-school supplies for underprivileged students (including tuition, books, bags)	2	0				
			Provide transportation for teachers	2	375,000				
			Conduct an assessment to identify opportunities and gaps related to the human resources required to achieve strategy objectives	3	0				
			Develop an effective M&E and reporting system for schools, including a feedback system for the school community	3	18,750				
			Develop and implement capacity-strengthening initiatives for responsible institutions to implement school feeding programs	3	75,000				
			Maintain Access Control and Perimeter Security for Schools and Kindergartens	3	0				
			Procure technical support for warehouse, maintenance and cleaning services	3	0				
			Provide nutrition, social-behavioral change, communication (SBCC) activities to children from KG to 6th grade and to parents through approved curricula and tools.	3	17,500				
			Develop a field expense tracking system	4	33,333				
			Support School Improvement Committees to enhance the school environment and quality of education	4	7,500				
						Increase access to quality education for children (male and female) in early childhood	Expand KG classrooms in public schools, procure furniture and equipment	2	250,000
						Conduct voucher system public-private partnerships to encourage the private sector to receive KG2 aged students at private schools especially in areas where public KGs are underserved	4	2,500	
Implement accelerated learning programs in targeted schools, including for literacy and numeracy	4	75,000							
Adapt career guidance activities for grades 7-10 to help them with their career/educational path	5	4,688							
Build capacity of KG-Grade 3 teachers through delivery of play-based learning training and resources.	5	0							
Conduct capacity building for public and private KGs on the new quality assurance system	5	18,750							
Develop learning engagement activities to encourage parents' participation in early childhood education; encourage parents to read to their children and practice math	5	50,000							
Develop reading events, activities and awards for KG-3rd grade	5	50,000							
Implement the Learning Bridges program for grade 4-10 students in MoE schools nationwide, aiming to contribute to their learning recovery. Support targeted centers nationwide to implement Learning Bridges Clubs for vulnerable children to provide them with safe spaces and support to complete Learning Bridges Activities.	5	37,500							
Implement school readiness programs for KG students entering G1	5	0							
Organize extracurricular activities to encourage children to develop their talents; focus on talent and skills development for grades KG-12	5	75,000							
Procure educational stories and books for KG-3rd for school libraries	5	0							
Procure learning-by-playing tools for KG2 students	5	0							
Support rollout of capacity-building for competency-based teaching approaches and procurement of educational tools for KG-3rd grades	5	30,000							

			Increase access to vocational education and improve its quality		Build Vocational Education Schools; equip workshops appropriately	4	0
					Provide vocational training for youth	4	800,000
			Ensure availability and sustainability of qualified human resources for the educational system		Automate needs identification and professional development management systems	4	83,333
					Develop and deliver a training program to KG-12 Grade English teachers, based on real life topics, in after-school clubs, integrate private sector speakers	4	46,875
					Develop and deliver an English upskilling program for teachers of Grades KG-12, based on real life topics, in after-school clubs	4	46,875
					Establish a conversational fluency program for English teachers of Grades KG-12 with the private sector	4	46,875
					Establish professional learning communities for teachers to support professional development	4	75,000
					Establish six early grade (1-3) training centers in directorates to improve in-service training quality, procure equipment and resources	4	466,667
					Promote Teaching and Learning Communities	4	3,750
					Provide teacher training on inclusive and student-centered pedagogy, classroom management and psychosocial support	4	60,000
					Support CPD training to supervisors, mentors and teachers on digital tools, life and business skills	4	80,000
					Support teacher and supervisor training on blended learning approaches	4	80,000
					Support the establishment of a digital examination center to conduct national and international assessments	4	700,000
					Train school counselors on PSS	4	6,000
					Train teachers on Social-Emotional Learning (SEL) Inclusive Education (IE) and work with parents.	4	60,000
			Safe, comprehensive and accessible school infrastructure for all, with a focus on gender and disability		Expansion classrooms and playgrounds in schools to reduce crowding in schools following MOE's operational plan for construction	1	275,000
					Procure maintenance supplies for schools	1	7,500
					Rehabilitate and procure school furniture, including heating and cooling units	1	250,000
					Conduct rehabilitation and maintenance works (including WASH facilities) based on a school facilities audit, following the MoE operational and maintenance system model	2	200,000
					Expand the intranet and Wi-Fi connections in schools to serve a blended learning approach	2	37,500
					Procure and support access to digital tools and devices for blended learning approaches	7	450,000
					Promote good practices to build capacity for the School Directorate and Governorate Council for "Assessment informed Construction and Maintenance"	7	35,000
			Strengthen the Safe Learning Environment and community engagement at MoE schools to foster a quality inclusive education system		Create community activities to engage students, parents and active community members to plan and execute school improvement activities. Activate continuous community events and partnership.	6	15,000
					Deliver awards (monetary and non-monetary) to students for upkeep of a safe school environment.	6	37,500
					Design and deliver orientation sessions to all school staff on the implementation of school policies, including code of conduct and activities regarding disciplinary practices. Establish a system for detection, referral, response and reporting of disciplinary action	6	15,000
					Design and deliver orientation sessions to students on the code of conduct, behavioral activities and a referral support system, to include responses and disciplinary action	6	15,000
					Organize group sessions by counselors about vandalism routes and prevention, assign students as speakers in these sessions	6	4,688
					Provide academic and psychosocial support to students at risk of falling behind	6	5,625
					Support schools with extracurricular activities, encouraging community work and awareness on school environment upkeep, promote use of youth centers, athletics clubs, and after-school study groups or clubs to strengthen a sense of belonging and ownership	6	75,000
					Train school staff on extracurricular activities	6	120,000
Host Communities	Health	Increase access, uptake and quality of primary health care for Jordanian and Syrian WGBM in impacted	Enhance management of communicable diseases, including immunization services		Enhancing IPC program in healthcare facilities	1	600,000
					Implement EPI Program	1	200,000
					Introduce chickenpox vaccine in National Vaccination Program	1	6,000,000

		areas	Provision of comprehensive package of RMNCHA plus	Build MoH capacity for early detection and treatment of disabilities or developmental delays including developmental hip dislocation (dysplasia) and congenital cardiac diseases	1	700,000
	Increase access, uptake and quality of secondary and tertiary healthcare for Jordanian and Syrian WGBM in impacted areas		Enhance management of communicable diseases, including immunization services.	Conduct a community survey and improve awareness and education about sexually transmitted diseases	3	110,000
			Ensure access to referral services for secondary and tertiary care	Establish an ER Department in Karak	1	100,000
				Provide access to secondary and life-saving services	1	31,952
			Ensure access to referral services for secondary and tertiary care.	Construction of new kidney dialysis center in the new Zarqa Government Hospital	2	70,000
				Ensure affordable access to secondary and life-saving services	2	31,952
				Provision of (15) fully-equipped ambulances	2	750,000
			Ensure quality access to emergency obstetric, neonatal and childcare	Equip obstetrics and neonatal units in several hospitals	1	3,000,000
				Build capacity and provide improved emergency response (Mobile ER and EMT Teams)	2	2,100,000
				Implementation and utilization of a real-time visual dashboard designed to monitor the Emergency Obstetric and Newborn Care (EmONC) network across the country	3	136,224
			Improve access to mental health services at the primary health level	Build capacity of the Health Community Clinic (HCC)-assigned staff (by MoH) on mental health awareness	2	46,000
				Conduct postpartum depression (PPD) awareness campaigns	2	60,000
				Integrate mental health care services into primary healthcare	2	588,070
				Provide capacity-building for health care providers on PPD	2	42,000
				RHAS HCC (Health Community Clinics) which is present at 190 MoH Health Centers will integrate mental health awareness services to create an understanding of some mental health topics and will connect with available mental health care service providers within communities to refer clients	2	12,000
			Improve accessibility of safe and confidential SGBV-related clinical services	Conduct awareness-raising sessions in health care centers on the importance of reporting cases of domestic violence	3	21,181
			Improve management of non-communicable diseases	Conduct National Screening program for colorectal and cervical cancers, and provide necessary treatment	2	4,000,000
				Provide capacity-building for NCD services providers	2	23,000
				Establish and equip smoking-cessation clinics to promote quit-smoking plans	3	22,000
			Improved accessibility of safe and confidential SGBV-related clinical services	Train healthcare providers to provide clinical services for GBV survivors	3	40,000
			Provision of comprehensive long-term rehabilitation for adults and children with injuries and	Provide comprehensive rehabilitation services for those who suffer from impairments	2	126,904
				Strengthen the capacity of rehabilitation centers through supplies, construction, and trainings	2	764,200
				Establishment of a specialized (tertiary) center for medical rehabilitation	3	750,000
			Provision of comprehensive package of RMNCHA plus nutrition services	National screening programs, confirmatory testing and treatment for congenital diseases in newborns	1	1,210,000
				Pre-marital screening test for thalassemia	1	100,000
				Strengthen the national Flour Fortification Program	1	1,000,000
				Capacity-building for staff and training of students on specific topics	2	45,000
				Provide parenting sessions for parents and caregivers within Health Centers	2	53,000
				Provide psychosocial support programs and screening for disabilities, targeting students	2	45,000
			Provide training on health services for women regarding breastfeeding, maternal and neonatal care	2	60,000	
			Capacity-building for Ministry of Health Healthcare Workers on Sexual and Reproductive Health Topics	3	40,000	
			Conduct awareness sessions on adolescent SRH at the health centers	3	30,000	

				Create comprehensive healthcare centers, accredited under a Women-Friendly Health Services Accreditation Program.	3	350,000		
				Implementation and utilization of a Health Information System (HIS) within SRH Primary Healthcare Centers	3	500,000		
				Provide training on interventions for SRH Services	3	100,000		
		Provision of comprehensive specialized secondary mental health service		Develop secondary care for mental health services, including an addiction unit, and adolescent children unit	2	2,400,000		
				Provide capacity-building opportunities for mental health care workers at secondary and tertiary levels	3	50,000		
				Provide comprehensive secondary mental health care	3	750,000		
				Support the operationalization of mental health inpatient units in general hospitals and community mental health centers	3	150,000		
Strengthen access, uptake and quality of integrated community interventions for Jordanian and Syrian WGBM in impacted areas	Promote appropriate healthy practices			Conduct awareness programs and activities on health issues including geriatric health and smoking cessation	2	170,000		
				Conduct capacity-building for the health committee at national level to strengthen organization of people with disabilities	2	3,000		
				Conduct NCD awareness campaigns	2	60,000		
				Establish/activate Community Health Committees to foster community engagement with a focus on health literacy of Syrian refugees and the most vulnerable and underserved population, commit to ensuring a gender balance in committee membership	2	100,000		
				Establish new elderly-friendly centers	2	15,000		
				Provide health awareness services for beneficiaries	2	160,000		
				Support implementation of the acceleration plan to stop obesity.	2	30,000		
				Establish elderly clubs	3	50,000		
				Establish health committees	3	30,000		
				Production, broadcasting and distribution of manual and electronic awareness materials	3	66,000		
				Production, distribution and training on guides and materials related to school health	3	20,000		
				Provide health awareness services	3	31,952		
				Support MoH to conduct STEPwise survey for NCDs risk factors, and disseminate findings to relevant policy-makers and stakeholders	3	66,000		
			Strengthen community health networks			Conduct practical trainings for Jordanians and refugees on several topics of crisis management	2	450,000
						Create capacity-building opportunities for MoH staff on: risk communication, community participation (RCCE) and elderly health	2	30,000
						Establish Community Health Committees	2	20,000
					Establish Healthy Community Clinics	2	210,000	
					Strengthen the community health volunteer network	3	495,328	
		Strengthen community-level mental health services			Train community health volunteers	3	46,952	
					Early detection of illness among early school-aged students	2	30,000	
					Provide Post Partum Depression (PPD) mental health awareness sessions inside Community Based Organizations (CBOs)	2	51,000	
					Train school counselors and teachers on detecting the early signs of mental illnesses	2	70,000	
					Counselors to conduct well-being sessions for students, parents and teachers in schools	3	70,000	
					Provide community mental health interventions	3	25,000	
					Provide mental health awareness sessions inside MoH comprehensive and PHC centers	3	24,000	
				Train school staff on how to create a welcoming environment and decrease bullying practices	3	30,000		
Strengthen adaptive capacity of the national health system to address current and future stresses	Enhance the cold chain and medical transportation fleet			Construction of new warehouses for vaccines	1	500,000		
				Revamp the current infrastructure of the warehouses and build a model change management.	1	330,000		
				Provision of (15) refrigerated vehicles to transport medicines and vaccines	2	280,000		
				Purchase of (15) medical waste transport vehicles	2	215,000		
				Purchase of (15) vehicles to transport medical teams and vaccination teams	3	215,000		
		Provision of Essential Medications and Consumables			Ensure adequate supplies of medicines and consumables for anesthesia and resuscitation	1	1,500,000	
				Provision of kidney drugs and consumables	1	1,500,000		

				Provision of laboratory consumables and materials	1	1,000,000
				Provision of life-saving medications	1	3,000,000
				Provision of medications for chronic diseases	1	3,000,000
				Provision of cancer and immunosuppressive drugs	2	1,500,000
				Establishment of Chest Diseases department on the campus of Nusseibeh Al-Mazniyeh College of Midwifery to serve the workers of Al-Hassan Industrial City	3	400,000
				Establishment of two new health centers in Irbid	3	100,000
			Provision of medical equipment	Provision of medical equipment for several ICU Departments	1	1,000,000
				Equip operation rooms in several hospitals	2	2,000,000
				Equip the new Princess Basma Hospital	2	20,000,000
				Establish specialized dental centers	2	1,500,000
				Provision of Central Autoclave with Shredder to Northern region	2	0
				Provision of medical and non-medical equipment to healthcare facilities	2	2,000,000
				Provision of medical beds to several hospitals	2	1,500,000
				Renovation of sterilization departments in hospitals	2	2,100,000
				Replacement of mammograms from the analog to digital in hospitals and health centers.	2	1,400,000
				Converting analog radiology equipment in hospitals to digital radiology, and providing hospitals and health care centers with digital imaging devices	3	2,800,000
				Provision of (CT) devices	3	3,000,000
				Provision of kidney dialysis devices	3	1,000,000
				Provision of MRI devices to Al-Bashir Hospitals	3	2,000,000
				Replace and provide new medical gases devices	3	700,000
				Upgrade and provide new mobile X-ray devices	3	2,824,496
			Strengthen Health Information Systems	Complete digitalization of Government Hospitals	1	5,500,000
				Expand the national record for hearing disability	1	300,000
				Data collection on refugees and migrants piloted in selected healthcare centers	3	10,000
			Strengthen health system Infrastructure	Construct new Azraq Hospital with a capacity of 20 beds	1	300,000
				Establish new blood bank to serve the northern region in Mafraq	1	100,000
				Expand and enhance children and premature baby departments in hospitals (neonatal)	1	700,000
				Support digitization of selected PHC facilities in targeted governorates.	1	350,700
				Construction of new Mafraq Hospital	2	500,000
				Renovation of kitchen and laundry equipment in several hospitals	2	400,000
				Construction of a new hospital in Madaba (total estimated budget=120 M USD)	3	15,000,000
				Rehabilitate the buildings of the old Salt Hospital to establish and equip a comprehensive health care center and 24-hour ER Services	3	500,000
				Renovate the old Zarqa Hospital to establish a comprehensive healthcare center	3	100,000
				Upgrade selected PHC facilities in targeted governorates to meet service standards in terms of improved location, infrastructures, staffing, equipment and supplies, IT, etc.	3	700,000
				Improve accessibility and quality of Tuberculosis (TB) and HIV services through the National Programs to Syrian refugees, migrants, other vulnerable populations, and key affected communities. Support National Programs in achieving TB elimination and preventing HIV transmission as well as supporting treatment, care and support for people living with HIV in Jordan.	2	1,000,000
				Integrate rehabilitation services at PHC level	2	86,000
				NCD and mental health integration in PHC including HEARTS, PEN, mhGAP, and THP by implementing WHO technical packages	2	440,000
				Support facilitation of the National Rehabilitation Platform and the Higher National Rehabilitation and assistive technology committee	2	5,500
				Support pilot schemes for the already developed national Early Detection clinical pathways and guidelines of the Developmental Dysplasia of the Hip (DDH) and Cerebral Palsy (CP)	2	29,000
				Support the integration of assistive technology in PHC	2	100,000
				Ensure funds are in place to cover the services of medical doctors required in certain specialties	1	3,000,000

				MoH Emergency Operation Center (EOC): priority actions identified and supported	2	50,000
				Conduct risk assessment at Governorate level for emergency preparedness around migrants and refugees (with follow-on actions supported)	2	30,000
				Strengthen zoonotic disease preparedness by implementing the Preparedness and Resilience for Emerging Threats (PRET) initiative	2	50,000
				Emergency Preparedness: develop plans for high threat pathogens (incl. RCCE, guidelines and SOPs, essential health services as NCDs) and implement priority actions	3	50,000
Refugees in Host Communities	Health	Increase access, uptake and quality of secondary and tertiary healthcare among Jordanian and Syrian WGBM in impacted areas	Enhanced management of communicable diseases, including	Implement EPI Program	1	200,000

Rehabilitation of water networks in Wastyeh District	1	5,000,000
Rehabilitation of water systems in Ayy District	1	5,000,000
Rehabilitation of water systems in Manshyit Abu-Humour	1	3,000,000
Rehabilitation of water systems in south Ghor and drilling new wells	1	5,000,000
Rehabilitation of water systems in Thalj and Marj Districts	1	5,000,000
Replacement of main transmission line (Khaw-Azraq)	1	15,000,000
Support access to safely managed and climate-resilient water services in host communities through rehabilitation and construction of improved water systems	1	1,044,467
People in host communities are provided with improved access to safe and equitable sanitation and wastewater services		
Construct modern, hygienic WASH block (toilet facilities) in public schools to ensure proper sanitation and privacy	2	500,000
Greywater treatment and reuse systems in schools and mosques in Jordan	2	0
Implement a greywater treatment system in constructed WASH blocks to treat greywater for reuse in toilet flushing.	2	225,000
Construction/rehabilitation of wastewater systems including sewer networks, pumping stations, and wastewater treatment plant.	2	4,000,000
Construction of nature-based wastewater treatment system lagoon in Jarash Wastewater Treatment Plant	2	0
Construction, rehabilitation, and maintenance of communal infrastructures/other structures	2	125,000
Implementation of Wastewater in Dlail, Halabat and Khaldyeh	2	28,000,000
Magharib Wastewater Project	2	3,000,000
Sewer network in South Amman 3	2	40,000,000
Support access to safely managed and climate resilient sanitation services in host communities through rehabilitation and construction of improved wastewater systems	2	265,430
Support efficient treatment and reuse of wastewater in Jordan. Improve water quality and storage capacity for irrigation use from Maerad WWTP	2	1,053,332
Support efficient water use and efficient irrigation of treated wastewater from Mafraq WWTP, Jordan. Modern irrigation system	2	804,400
Wastewater network in Azraq	2	19,000,000

					Wastewater services for Eira and Yarga	2	4,000,000
					Wastewater Services Project for the areas of Jdita, Kafr Rakeb, Kafr Awan, Kafr Abel, Beit Ides	2	28,000,000
			Strengthen enabling environment of the Government of Jordan to provide essential and sustainable water and sanitation services		Climate Change risk assessment in Mafraq Wadi	4	0
					Develop climate-resilient Urban Master Plans at municipal level, while mainstreaming climate change risks, vulnerabilities, and gender in project target areas.	4	562,000
					Development of awareness material related to personal hygiene, water conservation, and the environment. Build teacher capacity to conduct WASH awareness sessions for students and their caregivers.	4	200,000
					Support evidence generation and the development of WASH and Climate education and communication materials; support implementation of performance improvement frameworks in institutions	4	82,427
					Support evidence generation, innovation, research on WASH and Climate related issues	4	119,181
					Support the development and review of WASH, climate and environment related policies, strategies, and frameworks	4	281,403
					Support WASH sector coordination, institutional strengthening and national monitoring systems	4	347,612
					Support WASH services in institutions, support innovative solutions that increase adaptation capacity and address WASH and Climate priorities	4	606,943
Refugees in Host Communities	WASH	Refugees in host communities live in an improved physical environment that is safe and resilient to the impacts of climate change, they use improved water, sanitation and hygiene services while adopting appropriate hygiene behaviors and self-care practices	Improve environmental health and climate-related awareness of refugees in host communities through social and behavior		Awareness and Education Sessions. Organize regular awareness sessions for students and teachers to raise awareness about water conservation, hygiene practices, and the importance of responsible water usage (Islamic Relief Jordan)"	3	25,000
					Improve proper hygiene behavior and practices of refugees living in most vulnerable communities through awareness sessions and support for purchasing hygiene items	3	148,977
			Support evidence generation, innovation, research on WASH and Climate related issues		Construct modern, hygienic WASH block (toilet facilities) in public schools to ensure proper sanitation and privacy	2	500,000
					Ensure basic sanitation services and access to adequate sanitation facilities to refugees in most vulnerable communities	2	74,489
					Implement greywater treatment system in constructed WASH blocks to treat greywater for reuse in toilet flushing.	2	225,000
			Provide refugees in host communities with safe and equitable access to water services		Ensure basic water services (e.g., water tanks, water safety) to refugees in most vulnerable communities	1	74,489
Refugees in Camps	WASH	Refugees in camps live in an improved physical environment that is safe and resilient to the impacts of climate change, they use improved water, sanitation and hygiene services while adopting appropriate hygiene behaviors and care practices	Improve environmental health and climate related awareness in camps through social and behavior change interventions adopting key hygiene, water conservation, other climate related practices and social		Support evidence generation and the development of WASH and climate education and communication materials, support implementation of performance improvement frameworks in institutions in refugee camp	3	50,000
					Community-based WASH service provision in Azraq camp (hygiene promotion and community mobilization)	3	600,000
					Engagement and capacity-building of community members on wastewater solutions in Azraq camp	3	309,000
					Support informed interventions on positive behavior, social cohesion, and norms related to WASH and climate in refugee camps	3	280,159
			Provide refugee in camps with safe and equitable access to sanitation and wastewater services.		Ensure environmentally and cost-efficient sanitation and wastewater management in Za'atari Refugee Camp through the construction of a sludge management facility	2	10,700,000
					Ensure adequate sanitation and safe wastewater management in Syrian Refugee Camps including safely managed wastewater collection systems, desludging, operation of the wastewater treatment plant, as well as system improvement and optimization.	2	5,065,357
					Ensure environmentally and cost-efficient sanitation and wastewater management in Azraq Refugee Camp through the construction of a wastewater solution and reuse scheme	2	6,206,000
					Reduce the volume of wastewater and hence cost by installing grey wastewater reuse systems in selected public facilities	2	440,000

			Provide refugees in camps with safe and equitable access to water services		Ensure sufficient and safe water supply in refugee camps, including operation and maintenance of water supply systems, water trucking, system improvements and optimization (additional water sources expected in 2026)	1	12,976,860
Host Communities	Basic Needs	Strengthen quality of services to ensure that the well-being and basic needs of Syrian refugees and impacted host communities are met	Targeted refugees and other vulnerable groups, including women, men, girls, and boys, to receive assistance to ensure food security and to fulfill their basic needs effectively		Targeted vulnerable groups to receive basic needs assistance through cash	1	459,000
					Targeted vulnerable groups to receive food security and basic needs assistance through Core Relief Items (CRI) or in-kind assistance for their food and basic needs	2	18,763,395
					Targeted vulnerable groups to receive seasonal, emergency or other specialized food security basic needs assistance through specific seasonal, emergency or other specialized food and basic needs assistance	2	6,859,188
			Strengthen the quality of services to ensure that the well-being and basic needs of Syrian refugees and impacted host communities are met	Targeted refugees and other vulnerable groups, including women, men, girls, and boys, to receive assistance to ensure food security and to fulfill their basic needs effectively		Targeted vulnerable groups to receive food security assistance through cash or vouchers	1
Refugees in Host Communities	Basic Needs	Strengthen quality of services to ensure that the well-being and basic needs of Syrian refugees and impacted host communities are met	Targeted refugees and other vulnerable groups, including women, men, girls, and boys, to receive assistance to ensure food security and to fulfill their basic needs effectively		Targeted vulnerable refugees receive basic needs assistance through cash	1	166,654,051
					Targeted vulnerable refugees receive food security assistance through cash or vouchers	1	122,944,000
					Targeted vulnerable refugees to receive seasonal, emergency or other specialized food security and basic needs assistance through specific seasonal, emergency or other specialized food security and basic needs assistance	2	3,671,136
					Targeted vulnerable refugees to receive food security assistance including for specific nutritional needs. Social cohesion and community awareness sensitization through social and behavior change communication activities	3	250,000
Refugees in Camps	Basic Needs	Strengthen quality of services to ensure that the well-being and basic needs of Syrian refugees and impacted host communities are met	Targeted refugees and other vulnerable groups, including women, men, girls, and boys, to receive assistance to ensure food security and to fulfill their basic needs effectively		Targeted vulnerable refugees to receive basic needs assistance through cash	1	5,300,000
					Targeted vulnerable refugees to receive food security assistance through cash or vouchers	1	54,000,000
					Targeted vulnerable refugees to receive food security and basic needs assistance through Core Relief Items (CRI) or in-kind assistance for their food and basic needs	2	1,600,000
					Targeted vulnerable refugees to receive seasonal, emergency or other specialized food security and basic needs assistance through specific seasonal, emergency or other specialized food and basic needs assistance	2	1,000,000
					Targeted vulnerable refugees to receive food security assistance including for specific nutritional needs. Social cohesion and community awareness sensitization through social and behavior change communication activities	3	250,000

Attend to the needs of foster parents.

Host Communities	Protection and Justice	Create a favorable protective environment to prevent and respond to protection risks, including all forms of violence	Provide access to quality protection services for refugees and host communities. Strengthen CP, PSEA, GBV, human trafficking prevention and response, ensure a principled		Enhance foster care programs. Attend to the needs of foster parents. Provide appropriate care for unaccompanied minors	1	148,000	
					Improve the level of services provided by MoSD Community Service Offices assisting Syrian refugees, including offices dealing with domestic violence	1	1,000,000	
		Develop Infrastructure	Develop construction infrastructure		Establish independent juvenile courts and public prosecution departments. Equip with necessary logistical/technical supplies	4	1,000,000	
					Add a floor in the building of the First Instance court of Mafraq	8	600,000	
		Enhancing Access to Justice	Improving the efficiency and effectiveness of Legal Aid		Enhance the legal aid system through legal representation and legal consultations to encompass all criminal cases, legal claims. Support the Legal Aid Fund, especially by distributing project activities across all governorates of the kingdom	7	2,500,000	
		Increase efficiency and effectiveness of technological infrastructure in the Justice Sector	Build/develop/ rehabilitate the technological infrastructure of the judiciary		Establish domestic violence rooms in courts, logistically and technologically. Allocate a separate wing dedicated to domestic violence cases	1	200,000	
				Develop/rehabilitate the technological infrastructure and internal systems of the judicial		Maintenance of closed-circuit television network equipment in juvenile courts as needed	2	200,000
						Develop automated systems in the Alternative Sanctions Directorate; and electronic data sharing with courts and partner agencies	3	500,000
		Raising the efficiency and effectiveness of community sanctions implementation	Activate the alternative sentences as stated in the law		Conduct technical studies related to modern community sanctions capable of achieving behavioral rehabilitation goals	4	200,000	
			Developing and supporting the Community Sanctions Directorate at the Ministry of Justice		Supporting the Alternative Sanctions Directorate and its liaison officers in the courts with technical and logistical equipment	6	500,000	
		Strengthen inclusive national and sub-national social protection system in line with international protection standards (comprehensive, transparent and equitable) thus ensuring that the rights of vulnerable refugees and Jordanians are met and a decent life for all is promoted - social services	Accelerate responsive social protection system through an integrated approach including GCR		Awareness raising campaigns for NSPS. Report on Public Expenditure Review on Climate Change GCR implementation	4	2,000	
		Build institutional capacity and infrastructure for Sharia Courts premises. 			Prevent and respond to Sexual and Gender-Based Violence (SGBV)		Providing specialized GBV response services based on a survivor-centered approach.	4	1,998,430
			Provide quality child protection services to the most vulnerable children in Jordan, including those		Providing quality child protection services to children in Jordan.	1	1,852,294

			Respond to the needs of persons with disabilities, older persons at risk, and other vulnerable persons through referral systems, targeted assistance, and outreach		Rehabilitation and support to care centers; provide assistive devices to persons with disabilities, and urgent Cash Assistance for persons with protection concerns.	3	1,437,513
			Strengthen community-based multi-sectoral protection mechanisms and government capacity, including for CBOs and CSOs to support them with empowering vulnerable populations		Build capacity of national institutions, and CBOs/CSOs on psycho-social support such as Psychological first aid, individual or group counseling, Case management for Protection as well as structured self-care and stress management for staff.	5	3,300,500
			Strengthen the national child protection system for a humanitarian response in Jordan, including community-based mechanisms		Enhance knowledge on child protection issues among professionals and support relevant national policies	3	103,542

Host Communities	Basic Services	Enhance socioecological resilience of North East Badia.	Rooftop water harvesting systems established and community and household capacities enhanced.		Conduct a survey for the targeted area and assessment of degradation, and produce a survey report. Assess degradation and raise awareness around water harvesting systems. Assess and select targeted areas and establish water-harvesting systems. Identify and procure necessary equipment.	1	-
		Implement circular solutions to plastic pollution in the food and beverage sector in Jordan (A 5- year project 2025-2029).	Policy and institutional arrangements enabled.		Reduce single-use plastics through implementation of regulations and laws to control the production and leakage to the environment of single-use plastics. Develop regulations to regulate plastic industries input materials and identify roles and responsibilities of each entity. Encourage the use of alternative materials. Support the implementation of the extended producer responsibility. Encourage product take-back programs. Adopt Quality Standards for production and products and design a <i>Certification Quality Program</i> .	1	-
			Private sector engagement in circular solutions to plastic pollution enhanced.		Develop and scale up an innovation incubator. Promote the use of innovative materials and ecological alternatives. Pilot innovative business models such as plastic free restaurants, hotels and business etc.	2	-
					Implement modern and innovative technologies in the plastic industry with focus on better resource efficiency, to reduce its environmental impact and promote sustainable practices.		
			Capacities for knowledge exchange enhanced and awareness and reporting skills strengthened.		Improve access to resources and support South-South learning through knowledge management platform. Improve knowledge with traceability and transparency to better understand plastic pollution. Develop standards and policies to support more sustainable products. Design and implement Plastic reduction education campaigns.	3	-
			Social Behavior and patterns changed.		Strengthen knowledge and capacity to shift behavior practices towards circular plastics economy for food and beverage.	4	-

			Finance mobilized and public and private investment in circular solutions encouraged.		Identification and scaling up of fiscal policies and blended finance mechanisms and de-risking solutions to support innovative business models and technologies. Promote entrepreneurial and innovative ideas to unleash a "Waste Reuse-to-product" activities and small projects. Support small and medium sized enterprises for innovative materials or alternatives through grant-making mechanism.	5	-
		Improve access to inclusive and safe public spaces to enhance social cohesion.	Public spaces constructed and rehabilitated.		Determine sites and develop designs based on inclusive needs assessment, survey work, drawings, bill of quantities, technical specifications and bid services. Implementation of work (execution of civil, electrical, mechanical, architecture, landscaping, and place furniture). Holding awareness sessions on prevention of gender-based violence for members of host communities. Train the municipalities, parks' employees on green building skills. Facilitate the employment of local youth and women by contractors through cash for work.	2	5,300,000
		Improve capacity of local governments in responding to the impacts of displacements through proactive planning	Selected cities are enabled to implement humanitarian recovery and development investments, with improved capacity of local governments in responding to the impacts of displacements through proactive planning.		Develop Spatial Profiles for selected cities and implementation plans for pilot areas.	14	-
			SDGs localization enhanced to respond to the needs of communities.		Develop Voluntary Local Review Reports for selected cities.	13	-
	Improve inclusive, environment friendly and energy efficient infrastructure for municipal service delivery performance in Solid Waste Management.	Waste Collection Operations			Selecting sites and purchasing necessary equipment and containers.	5	5,908,582
		New digesters and waste units for energy conversion created.			Plan and construct digesters and waste unit plants, including installation, works, operation and maintenance.	10	2,001,910
		Enhanced material recovery through composting plants, including a recycling plant.			Plan and construct composting plants plants, including installation, works, operation and maintenance.	8	6,177,200
		Enhanced institutional capacities on SWM.			Implementation of various training courses (solid waste management, financial management, fleet management, operation and maintenance, risk management, human resources, planning management, security and safety, etc.).	12	1,000,000
		Service delivery enhanced and Resource efficiency in SWM strengthened.			Support municipalities to implement Local Gender sensitive SWM Plans priorities." Provide SWM services (Garbage collection and disposal) at Zaatari Refugee Camp and	9	3,700,000
		Resource efficiency in SWM strengthened.			Establishing an efficient and sustainable solid waste recycling system in Sahab, enhancing resources optimization.	17	-
	Improve Municipal service delivery performance	Breeding of stray dogs reduced, vaccinated and neutered.			Establishing clinics and temporary shelters to reduce the breeding of stray dogs	4	250,000
		Existing primary and secondary municipal roads and lanes (including curves) maintained and new roads and lanes constructed.			Determine the geographical locations in coordination with beneficiaries. Conduct Survey work ,designing panels, Bill of quantities and technical specifications, and set up a complete purchase. Implementation of work.	3	10,000,000
		Existing infrastructure enhanced to reduce risk of flash floods.			Planning and implementation work such as excavation, backfilling, concrete, reinforcing steel, pipe insulation, manholes, warning signs, etc. and infrastructure maintenance.	2	5,000,000

			Necessary equipment and machinery purchased.		Preparing tender documents and implementation phase (purchased).	1	10,000,000
		Improve municipal services delivery performance in solid waste management.	Low emission infrastructure for Sanitation, Waste Management and Energy Production improved.		Construction of Leachate Treatment Plant on DBO Scheme. Expand the landfill capacity by constructing new cell (cell #7). Install treatment and upgrading of the extracted biogas. Capping cell # 5 and connecting to the LFG Plant to generate electricity. Capping cell # 6 and connecting to the LFG Plant to generate electricity.	1	16,000,000
			Institutional and community capacities for Solid Waste Management and Sorting at Source enhanced.		Expanding Recycling banks. Expanding pilot areas in (3-4) neighborhoods.	2	3,000,000
		Improve urban planning by enhancing the resilience of local government systems and communities to face crises, with a special focus on social cohesion.	National Inclusive urban policy for		Develop a national urban policy and prepare the action plan. Develop a capacity building plan on urban policy implementation. Implement pilot projects to support urban policy for some municipalities.	11	640,000
			Awareness on regional urban planning is enhanced and research is conducted.		Preparing and drafting urban environment management Manuals. Develop, format, and disseminate manuals on regional planning concepts and optimizing urban studies tools and natural heritage within them.	16	100,000
			MoLA's capacities in land use mapping and master development planning is strengthened.		Providing technical support to the Ministry's Master Plan Directorate and training municipal staff on the updated land use map. Prepare development master plans for three municipalities in each region. Build the capacity of municipalities staff to develop master development plans.	15	200,000
			Enhanced green infrastructure and solid waste management		Create green infrastructure and improve solid waste management		250,000
		Introduce and promote renewable energy and energy efficiency technologies and solutions to support the increased energy	Renewable Energy share in Electricity Generation increased.		Install Solar Energy Systems of 2KW for vulnerable and Syrian households in Jordan, taking into consideration the gender inclusion.	1	1,412,048
			Energy Efficiency in different sectors increased by 9%.		Install Solar Water Heaters for vulnerable and Syrian households in Jordan. Apply Energy Efficiency Standards for vulnerable and Syrian households including installing led bulbs and insulation technology in houses and shelters.	2	1,347,228
		Support E- governance through enhanced E-municipal services for Amman Citizens.	E- services Evaluated for improvements.		Conduct assessment and evaluation of GAM E-services.	7	500,000
		Support inclusive Conservation and Restoration of Forest area in Northern Jordan.	Enhanced community engagement, awareness of conservation and restoration of forest areas.		Conduct needs assessment and training on monitoring conservation and restoration of forest areas. Consultation with local communities and scientific and research/think tanks on community engagement for restoration efforts.	1	600,000
			Minimize pressure on forest resourced from human activities.		Assessment of socioeconomic conditions in the target areas and implementing educational programs based on assessment results. Assessment of degradation of forest ecosystems in the target area. Building capacity of local actors in forest conversation and restoration.	2	400,000
Refugees in Host Communities	Basic Services	Environmentally aware society.	Environmental Education linked to operational response		Awareness creation on World Environment Day Wicking System introduction at the Azraq and Za'atari Camps to Mafraq, Irbid and Zarqa Environmental Clean-up campaign	4	60,000

Refugees in Camps	Basic Services	To enable refugees and host communities to access adequate affordable and secure energy services	Camp infrastructure linked to national grid by plan with development actors/municipality.		Electricity provision and Bills at Za'atari/Azraq/KAP.	1	6,000,000
		To enhance energy infrastructure.	Camp infrastructure linked to national grid by plan with development actors/municipality		Low voltage at Za'atari and Azraq maintained. Medium Voltage at Za'atari and Azraq maintained. Operations and Maintenance O&M services of the Solar Plants at Zaatari and Azraq provided.	2	2,600,000
		To introduce and promote renewable energy and energy efficiency technologies and solutions to support the increased energy needs	Camp infrastructure linked to national grid by plan with development actors/municipality.		Improved energy efficient Shelter Typology introduced. Smart Energy Sub metering strengthened. New household Solar Energy Kits at urban areas improved. Value of the grid maximized and use of Generators eliminated.	3	6,196,553

Host Communities	Shelter	Improve and enhance access to adequate, secure, safe and affordable shelter, housing and settlements in camps and host communities for Jordanians and Syrian refugees	Deliver the concept of green design and sustainability to local community markets		Conduct awareness and capacity-building sessions for the local community on sustainable practices. Rehabilitation and retrofitting of low-income local community families' homes. Support local families in building new homes (Sustainable Conventional Materials and Techniques). Collect and analyze results data and prepare research studies on sustainable affordable construction techniques	1	500,000
			Provision of Cash-for-Rent		Each household will receive a Cash-for-Rent amount for a certain number of months, each identified eligible family will be required to submit relevant supporting documents i.e., rent or contractual agreement with the landlord, in addition to official bills identifying the rented facility	2	60,000
			Rehabilitate cultural heritage and old housing in host communities - Karak		Provision of Cash-for-Rent assistance	2	210,000
			Urban shelter rehabilitation and maintenance: mainstream environment and energy best practices		Rehabilitating cultural heritage and old housing in host community areas in Karak Governorate and enhancing tourism potential for socioeconomic empowerment	3	330,000
					Conduct rehabilitation work and maintenance activities on selected houses, ensure safe transfer of the houses after completion. Install solar energy system and solar heating system to targeted homes	4	1,700,000
					Evaluation of Vulnerable Shelters in Host Communities	4	150,000
					Maintenance and upgrade of communal infrastructures/other structures	4	138,000
					Provide shelter and settlement support to refugees and host communities through an area-based approach that looks at the overall needs of a vulnerable neighborhood at shelter and community-level	4	500,000
					Rehabilitate housing in vulnerable areas impacted by migration in Greater Amman Municipality	4	330,000
					Rehabilitate housing in vulnerable areas impacted by migration in Greater Mafraq Municipality	4	330,000
	Train refugees and vulnerable Jordanians in shelter-related fields. Provide support for trained refugees and vulnerable Jordanians to conduct shelter rehabilitation projects in their communities. Shelter rehabilitation of refugee and vulnerable Jordanians shelters	4		60,000			

Refugees in	Shelter	Improve and enhance access to	Provision of Cash-for-Rent		Cash-for-Rent for a minimum of 3 months	1	397,246
--------------------	----------------	--------------------------------------	-----------------------------------	--	---	---	---------

Host Communities		adequate, secure, safe and affordable shelter, housing and settlements in camps and host communities for Jordanians and Syrian refugees	Urban shelter rehabilitation and maintenance: mainstream environment and energy best practices	Each household will receive a cash for rent amount for a certain number of months, each identified eligible family will be required to submit relevant supporting documents i.e., rent, or contractual agreement with the landlord in addition to official bills identifying the rented facility	1	140,000
				Provide Cash-for-Rent assistance to refugees and host communities and increase security of tenure	1	340,000
				Provision of Cash-for-Rent assistance	1	490,000
				Conduct rehabilitation work and maintenance activities of selected houses, and ensure safe transfer of houses after completion. Install solar energy systems and solar heating systems in targeted homes	2	200,000
				Provide assistance to improve physical accessibility in shelters for people with disabilities	2	85,000
				Provide shelter assistance that introduces and mainstreams environmental best practices, such as energy efficiency, use of renewable energy, and water management	2	500,000
				Provide shelter rehabilitation, rent-free assistance, and increased security of tenure for refugees and host communities	2	1,275,000
				Shelter repairs and rehabilitation	2	172,500
				Train refugees and vulnerable Jordanians in shelter-related fields. Support for trained refugees and vulnerable Jordanians to conduct shelter rehabilitation projects in their communities. Shelter rehabilitation for refugees and vulnerable Jordanians	2	140,000
Refugees in Camps	Shelter	Improve and enhance access to adequate, secure, safe and affordable shelter, housing and settlements in camps and host communities for Jordanians and Syrian refugees	Camp Shelter Maintenance/Upgrade	Improve sustainability of shelter and infrastructure in camps, including energy efficiency and use of renewable energy. Provide basic maintenance training to female heads of households. Create community space that will allow appropriately skilled people to work with their own material and upcycle salvaged material under organization's supervision	1	2,400,000
				New shelter construction in Azraq Refugee Camp. Shelter rehabilitation and maintenance conducted in Azraq Refugee Camp	1	200,000
				New Shelter Construction. Shelter Repairs and Rehabilitation. Communal infrastructure/ structures maintenance and upgrade	1	23,800,000
Host Communities	Agriculture	Create a better environment for a competitive private sector access to finance for a better market trade	Facilitate partnerships with the private sector to promote resilience in the sector	Facilitate smallholder enrollment to macro-economy through grants linked to contractual farming	2	1,000,000
				Promote access to finance and agricultural credit	2	700,000
				Promote public-private partnerships in agriculture, promote access to markets including small producers, NGOs and cooperatives	2	300,000
				Provide micro-finance packages for smallholder farmers	2	500,000
		Enhance food security status in the region	Enhance collaboration between countries in the region for food security	Monitor vital indicators of food security and issue early warning reports and recommendations to countries in the region to meet potential emergency situations	1	100,000
				Provide analytical information and inductive reports on the state of food security in the region based on international dynamics related to production and transportation prices, food availability, and food prices	1	150,000
				Provide periodic reports on food security in the region on all aspects of food security, based on data to be collected from countries in the region with other relevant regional and global data	1	70,000
				Creation of Food Data Intelligence System for Syrian refugees in Jordan and host countries	2	750,000
		Enhance the work of cooperatives to promote the efficient and sustainable use of agricultural resources to enhance food security for host communities and Syrian refugees	Enhance food security by supporting agricultural cooperatives	Enable agricultural cooperatives to provide credit and market access at local, national and international levels. They are better placed to provide credit and market access at these levels	1	300,100
		Improve the efficiency of the value	Enhance food security by	Build capacities for targeted local cooperatives and beneficiaries to improve the quality of animal and plant products; equip beneficiaries with necessary inputs	2	500,000

		chain of agricultural products and food commodities to enhance food security of host communities and Syrian refugees	improving the value chain of plant and animal commodities; enhance product quality and market access	Connect beneficiaries to best practices in the value chain for agricultural products including procurement, marketing, packaging, processing units and cold chains	2	1,500,000
				Establish value chain analysis to identify entry points for improving agricultural products	2	110,000
				Facilitate linkages to markets for smallholder producers; establish innovative financial models to reduce risk on value chain actors	2	-
				Support establishment of 11 agricultural fairs (seasonal and permanent exhibitions)	2	50,000
		Promote efficient and sustainable use of agricultural resources to enhance food security for host communities and Syrian refugees	Improve livelihoods in host communities to generate income by treating and processing of plant and animal waste to produce natural fertilizers and biomass	Construction of nature-based wastewater treatment system lagoon in Jarash Wastewater Treatment Plant: area = 900m2	1	-
				Efficient treatment and reuse of wastewater in Jordan. Improve water quality and storage capacity for irrigation from Maerad and Madraq WWTP.	1	1,053,332
				Treatment and reuse of wastewater		
				Water Storage: 3,000m3		
				Water Storage: 2,000m3		
				Irrigated dunums: 100 "		
				Water-use: efficient irrigation of treated wastewater from Mafraq WWTP, Jordan.	1	804,400
				Modern irrigation systems		
				Increase the amount of reclaimed water allocated for irrigation to 15%		
				120 donums by JOHUD		
				75 donums by BADIA		
				Capacity building in technical skills for manure production and the use of wood and small branches of trees in forests (after pruning) to generate income for beneficiaries	2	100,000
				Install biogas and organic fertilizer units at household and commercial levels	2	300,000
				Permaculture demonstration site showing efficient water use systems for students and farmers; include examples of organic farming that increase the quality and quantity of soil (creating a bio-sponge) while producing nutrient-dense food, this system reduces water needs.	3	384,046
				bio-fertilizer production; crop garden and compost; egg-laying chickens; compost worms; olive orchards; monoculture conversion to food forests		
				Raise awareness and conduct assessments on food loss and waste; provide the knowhow to produce household compost	2	300,000
				Bring best practices and innovative e-solutions to sustainable transformative food systems at different levels (farms, markets, etc.)	2	100,000
				Linking science and academia to digital solutions and e-extension for farmers to run their businesses in a sustainable way	2	150,000
				Promote digital agricultural practices among farmers and Smart Applications for sustainable food systems	2	200,000
				Capacity-building and awareness-raising for farmers on Best Practices During Disasters	3	100,000
				Establish e-commerce for smallholder farmers to enable them to access markets	3	100,000
		Protect human, animal and plant health and ensure consistency with government obligations	Control spread of diseases and pests while increasing economic stability	Enhance government capacity to control zoonotic and transboundary diseases and pests	1	100,000
				Enhance private sector capacity and awareness of antimicrobial resistance, pesticide management	1	50,000
				Ensure enforcement of laws to control communicable diseases	1	50,000
				Raise farmer awareness on disease control	1	50,000
				Strengthen the capacities of quarantine centers and laboratories	1	300,000
		Strengthen the resilience of the food security sector by preventing new risks, reducing existing disaster risks and managing residual risks	Strengthen capacities to withstand and manage hazards and disasters	Assess main disasters and their management strategies	1	150,000
				Enhance government capacity in terms of disasters and their management plans	1	50,000
				Equip disaster management fund and strengthen its capacity	1	700,000
				Establish drought early warning system (EWS) and early action protocols	1	350,000
				Raise community awareness on disasters and appropriate anticipatory actions	1	50,000
				Pilot early actions	2	-
Refugees in Host	Agriculture	Promote efficient and sustainable use of agricultural resources to	Enhance food security and safeguard livelihoods for	Capacity-building of underprivileged Jordanians and Syrian refugees in smart agricultural production using outreach and training programs	1	348,742

Communities		enhance food security for host communities and Syrian refugees	smallholder farmers in host communities most affected by coronavirus by promoting labor-intensive agribusiness	Support packages for smallholder producers	2	250,000
				Construction and maintenance of water harvesting structures by Jordanian and Syrian refugee workers	1	50,000
				Install smart agriculture systems, units, irrigation systems	2	313,550
				Capacity-building for underprivileged Jordanians and Syrian refugees in smart agricultural production using outreach and training programs	2	20,000
		Promote efficient and sustainable use of natural resources to enhance food security for host communities and Syrian refugees	Enhance food security for host communities living near forests through green infrastructure	Capacity-building for vulnerable Jordanians and Syrian refugees using nutrition and healthy food outreach programs, promote capacity-building and awareness	1	100,000
				Excavation maintenance, dams, and water collection works by Jordanian and Syrian refugee workers	1	200,000
				Install solar units, irrigation systems, provide seeds and farming services	1	500,000
				Integrated Agro-Industrial Food Park in Madaba Governorate to support job creation and income generation. 50% of the labor will come from Syrian refugees outside camps	2	8,000,000
				Promote non-wood forestry activities for beneficiaries living near forests	3	100,000
				Promote natural foraging while restoring Badia	2	100,000
				Integrated Agro-Industrial Food Park in Mafraq Governorate. Support job creation and income generation. 50% of the labor will come from Syrian refugees in Camps	2	10,000,000
				Natural Resource Management projects in prioritized forest and rangeland sites	3	500,000

Host Communities	HE and TVET	Improve industry engagement by strengthening links between TVET providers and workplaces	Expand workplace experience through work-based learning	Design model for work experience program for TVET students applying the work-based learning (WBL) criteria	1	100,000	
				Implement WBL programs with private sector engagement	2	700,000	
			Roll out competence-based vocational training	Support TVET institutions in designing and implementing high quality, competence-based vocational training programs	16	1,000,000	
				Support TVET teacher training by the private sector	Train TVET trainers by the private sector	6	50,000
		Provide capacity-building for national higher education and technical and vocational institutions to deliver inclusive, high quality HED and TVET	Develop infrastructure and provide TVET equipment	Provide accessibility and allow accommodations for students. Improve infrastructure in higher education institutions and vocational education schools, provide the physical	10	500,000	
				Provide adapted equipment and tools for persons with disabilities, through partnership with the private and public sectors	11	25,000	
				Improve vocational education centers to meet the requirements of people with disabilities	12	25,000	
				Provide vocational training equipment and advanced technologies	13	25,000	
				Establish a training center equipped with the recent technology to host different training programs, including vocational and upskilling programs.	24	2,000,000	
				Conduct a comprehensive needs assessment of facilities	25	50,000	
				Engage with key stakeholders for consultations	26	25,000	
				Enhance human resources and institutional capacities to deliver quality higher and technical vocational education	Create legislation that allows the admission of students with disabilities into vocational education	7	-
					Expand and operate three Connected Hubs	8	295,000
					Establish partnerships with industry experts to support vocational competence-based training to teachers and supervisors	9	1,000,000
Design and conduct professional development and orientation events with vocational experts from civil and local organizations and the private sector to vocational school educators and students	22	1,000,000					
				Train the Trainers: Conduct workshops and professional development sessions for instructors to ensure they have up-to-date knowledge and teaching techniques	23	20,000	
				Implement training programs with HED and TVET teachers and staff on the human rights approach for addressing the rights of persons with disabilities. Discuss the etiquette for communicating with persons with disabilities, the declaration of inclusion and diversity in education that Jordan launched in 2022, and the guide to providing appropriate accommodations, accessible learning formats, and general accessibility in higher education institutions	27	25,000	

				Provide training for TVET teachers on inclusive education	28	67,000
				Provide assessment tools which are adapted for students with disabilities according to the requirements of each profession through partnership with those concerned in the Ministry of Education, Higher Education, and the private sector	29	5,000
			Expand Recognition of Prior Learning (RPL) a set of standards, competencies, or learning outcomes	Expand recognition of prior learning (RPL) a set of standards, competencies, or learning outcomes	3	500,000
			Support TVET institutions and the National Skills Sector Councils (NSSCs) in identification skills and implementing quality TVET programs	Implement skills identification interventions with NSSCs and TVET providers	5	100,000
		Provide competent Jordanian and Syrian workers who acquired their skills through informal learning with official certificates/occupation practice licenses that facilitate the search for appropriate jobs in Jordan or abroad	Create capacity-building opportunities for individuals with specific training courses or assessment tests to enable them to transfer to the next level/grade within the same level of JNQF	Capacity-building of all key stakeholders in the registration of qualifications	14	200,000
			Qualifications placement on the JNQF	Establish a pilot program for qualification registration with selected institutions and programs	15	75,000
		Provide competent Jordanian and Syrian workers who acquired their skills and competencies through non-formal/informal learning with official certificates/occupation practice licenses that facilitate finding appropriate jobs in Jordan or abroad	Appoint a multi-stakeholder taskforce for a National Graduate Attribute Framework	Develop a Graduate Attribute Framework	21	75,000
		Strengthen the skills and TVET system and encourage private sector engagement	Provide support for different pillars in the skills and TVET system in Jordan	Provide support for different pillars in the skills and TVET system in Jordan	20	200,000
			Support curriculum planning and development	Conduct Industry Needs Assessment. Collaborate with local industries and employers to identify current and future skill demands. Analyze labor market trends, job openings, and emerging industries to inform curriculum development	4	20,000
				Develop Competency-Based Learning Outcomes. Define specific, measurable competencies that learners should acquire upon completion of a program, focusing on practical skills and knowledge	17	20,000

				Conduct Learner Surveys and Feedback Sessions. Gather input from current and prospective learners to understand their interests, learning preferences, and career aspirations; use this feedback to tailor curriculum content and delivery methods to meet the needs of learners	18	20,000
				Organize joint workshops with private sector representatives to identify industry-relevant subjects and modules (50 sessions/ \$ 5000 per session)	19	25,000
				Develop Curriculum Guidelines and Standards. Create clear guidelines and standards for curriculum development, including assessment methods, learning materials, and instructional strategies	30	30,000
				Ensure Accreditation Compliance. Regularly review and update the curriculum to meet accreditation standards that have been set by relevant educational authorities	31	20,000
				Establish Partnerships with Industry Certifying Bodies.	32	20,000
				Implement continuous monitoring and evaluation mechanisms. Establish a system for ongoing assessment and evaluation of curriculum effectiveness. Conduct periodic reviews and updates to ensure relevance and quality	33	30,000
				Establish Industry Advisory Boards. Form advisory boards comprising professionals and experts from relevant industries to provide guidance on curriculum design and updates	34	20,000

Refugees in Host Communities	HE and TVET	Enhance partnerships with the private sector in TVET	Implement a work-integrated program with the private sector	Establish Partnerships with vocational institutions. Forge partnerships with accredited vocational training institutions to expand course offerings and provide specialized training	5	20,000		
				Assess Training Needs. Conduct surveys and consultations with the target population to identify the most in-demand skills and trades. Collaborate with local industries to align training programs with job market demands	8	20,000		
				Develop NOS with NSSCs	12	50,000		
		Link vocational education and training to labor market needs through skills acquisition	Enhance access to certified vocational training for Syrian refugees and Jordanians	Issue an occupational license for trainees who pass the TVSDC exam		9	50,000	
				Expand entrepreneurship training and home-based income-generation opportunities, also access to finance for young Syrian refugee and Jordanian men and women	Provide entrepreneurship opportunities to improve skills of Syrian refugees and Jordanians in entrepreneurship development and starting their own businesses		7	1,000,000
					Implement WBL programs		6	100,000
					Support access to vocational training opportunities in VTCs for upskilling and re-skilling	8	5,000,000	
		Provide equal and inclusive opportunities in higher education and vocational and technical education to refugees and vulnerable Jordanians	Enhance access to certified vocational training for Syrian refugees and Jordanians	Link TVET students with work-based learning opportunities in the private sector and provide job placement opportunities		15	-	
				Conduct Outreach Campaigns. Organize information sessions in refugee camps, urban centers, and communities to raise awareness about available vocational training opportunities		1	20,000	
				Streamline Application Processes. Simplify and digitize application procedures to reduce barriers to entry; provide assistance with filling out application forms for those with limited literacy or language skills		10	20,000	
				Upgrade Existing Centers. Conduct assessments of current training facilities and make necessary renovations or improvements. Ensure that training centers are equipped with modern tools and resources		11	60,000	
				Conduct outreach activities to enroll young people 16 years and above in TVET trainings		13	30,000	

				Implement Continuous Monitoring and Evaluation. Establish a system for regular assessments of training programs to identify areas for improvement and maintain high standards	16	20,000
		Expand access to vocational education and training		Provide scholarships through collaboration with donors, NGOs, civil society, and the private sector	1	2,000,000
				Support enrollment of secondary students in VTCs upon completion of Grade 10	2	2,000,000
				Provide a 9-month Professional diploma accredited by the TVSDC	3	2,361,446
				Provide vocational training to Syrian and Jordanian children 16 years and above linked to labor market needs and greening skills	14	225,000
		Expand scholarships for refugees and Jordanians in universities and technical and vocational education centers/colleges		Establish collaborations with private sector and civil society to support academic and vocational scholarship pathways for vulnerable students to continue their post-secondary education at universities and vocational colleges, training centers and institutes	4	2,135,000

Refugees in Camps	HE and TVET	Ensure access to non-formal and short-term TVET opportunities for refugee students	Provide non-formal and short-term TVET courses for Syrian refugee students in TVET centers including VTC centers and MoE/NFE programs	Community Engagement and Outreach. Conduct awareness campaigns within refugee communities to inform them about available non-formal and short-term TVET opportunities	5	8,000
				Support enrollment of refugee students in camps in non-formal and short-term TVET courses (2-year TVET programs)	7	5,000,000
				Facilitate access to non-formal and short-term TVET courses	8	150,000
				Design and develop programs tailored for refugees according to the needs of the local, regional or global market.	9	10,000
				Provide expert trainers to implement training programs according to the shortage of formal trainers within VTC.	10	200,000
				Create curricula and programs accredited by TVSDC to train education providers	12	5,000
				Provide assistive tools for online learning to ensure delivery of quality training, such as virtual simulators, instructor software to facilitate the creation of interactive learning components	13	50,000
				Provide Scholarship and Financial Support. Establish a scholarship program or financial support system to alleviate the economic burden on refugee students and their families	17	50,000
				Create Stakeholder Collaboration and Partnerships. Establish partnerships with local NGOs, government agencies, vocational training centers, and private sector organizations to create a supportive ecosystem for refugee education	18	6,000
				Establish workshops inside the camp according to the programs that will be implemented.	18	200,000
		Develop occupational standards tailored to CAMP occupations	22	40,000		
		Increase employability prospects in Jordan.	Empower youth economically, particularly women, by providing them with demand-driven training to acquire the relevant skills and knowledge for sustainable livelihoods.	Internship and Apprenticeship Opportunities. Facilitate partnerships with local businesses to provide refugee students with hands-on training through internships and apprenticeships	3	20,000
				Conduct hybrid technical, soft skills, and English for business training courses	6	400,000
				Recognition of Prior Learning (RPL). Implement an RPL system to acknowledge and credit any prior learning or skills that refugee students may have acquired	19	6,000
				Post-Program Support and Follow-Up. Provide ongoing support to graduates, including job placement assistance, mentoring, and access to further education or advanced training	20	10,000
Flexible Scheduling and Modes of Delivery. Provide flexible scheduling options, including evening and weekend classes, to accommodate the diverse needs of refugee students	23			10,000		
Provide equal and inclusive opportunities in higher education and vocational and technical education for Syrian refugees	Ensure access to Vocational Education (VE) for Syrian refugee students	Provide tools to access training resources remotely, such as: laptops, virtual meeting software, simulators, and training-specific supportive software applications	16	30,000		
		Expand scholarships in universities and technical and vocational education				
	Provide scholarships for academic and training programs for in-camp refugees	1	20,000			
Provide a 4-year bachelor's degree program for refugee students	2	2,360,000				

			Vocational education centers/colleges		Provide support and advocacy for more inclusive HE for refugees in Jordan	11	498,667
					Establish collaborations with private sector and civil society to support academic and vocational scholarship pathways for	14	5,000,000
					Conduct studies to analyze qualifications and training needed for the targeted group	15	20,000
					Establish collaborations with private sector and civil society to support academic and vocational scholarship pathways for	21	2,135,000
			Provide access to Vocational Training (VT) for Syrian refugee students in a satellite vocational		Establish a vocational satellite training center in Al Zaatari or Al Azreq Camp schools based on the current vocational experience of HTU	4	250,000
					Support enrollment of refugee students in camps in Vocational Training in a specifically created vocational satellite center	4	1,000,000
